

ENVIRONMENT, HEALTH, SAFETY AND TOTAL LOSS OF MANAGEMENT

Enseco provides services that satisfy the needs of customers within Canada and the USA. Our operating activities can impact people, the environment, property and corporate assets. It is a fundamental commitment of Enseco to safely manage such impacts.

This commitment will be demonstrated in all material plans, decisions and actions of the company, its employees and its contractors by:

- Providing a safe work environment;
- Developing the competency of a well trained workforce;
- Protecting the health, security and well-being of employees;
- Avoiding, minimizing or safely managing the impacts of our activities on the natural environment and on the communities in which we operate;
- Dealing openly with stakeholders who may have an interest in our operations or development projects;
- Avoiding waste and conserving energy and natural resources;
- Setting and reviewing prudent environmental, health and safety targets; and
- Establishing appropriate programs aimed at compliance with applicable regulatory standards.

To support these goals, Enseco incorporates a Total Loss Management (TLM) system in its business and operations. TLM serves as the company's overarching framework for environment, health and safety performance, providing clear management expectations, detailing employee responsibilities and serving as a mechanism for ongoing stewardship and continuous improvements through a program of regularly scheduled audits, and preventative maintenance.

Enseco will make efforts to inform workers, governments, customers and the public about potential hazards inherent in the nature of our work as Enseco recognizes that each has a role with Enseco in protecting themselves, others and the environment from potential hazards.

Our managers, employees and others engaged on our behalf are expected to carry out their duties in a manner designed to protect themselves, their fellow workers, the public, the environment and the physical assets of Enseco. We are prepared to respond to unplanned events with suitable emergency plans and management processes.

Enseco's President and officers are responsible for the implementation of this policy and the TLM system in their specific areas of responsibility and will support Company-wide initiatives. They shall regularly report the TLM performance for their operations to the Environment, Health and Safety Committee of the Board of Directors, measured against recognized standards and benchmarks.

The Executive team is responsible for the approval, maintenance, regular review and interpretation of this policy and for providing the resources requires for the continual improvement and implementation of TLM programs.

A handwritten signature in black ink, appearing to read 'Lane Roberts', is written over a horizontal line.
